 [/rishanthgautam](https://www.linkedin.com/in/rishanthgautam)

Architect with 6+ years of expertise building scalable architectures and Data-Driven Products across Industries. Expert in Data Modeling, SQL, Architecture & Strategy, with sharp **product and design sensibility** across the full lifecycle, from discovery to adoption.

Timeline

Johnson Grammar School	Jawaharlal Nehru Technological University	First Citizens Bank (via TCS)	Baxter Healthcare Inc
			
● 2013 9.3 CGPA	● 2019 8.7 CGPA	● 2019 - 2023 Data Architect	● 2023 - * Analytical Engineer

Impact

 \$800K+/year in savings  40% faster reporting  12+ Data Products  Applied Data Intelligence

Work Experience (6+)

- Strategic Architecture & Modernization**
 -  **SaaS Internalization:** Architected a ground-up Spend Analytics stack on AWS, PowerBI eliminating \$300K/year in external licensing fees.
 -  **Data Mesh Migration:** Orchestrated the transition from monolithic legacy Oracle warehouse to distributed Redshift.
 -  **Flagship Customer 360 Engine:** Built a unified model for Commercial, Private banking and Capital data to serve as the primary Source of Truth for Sales and Marketing teams.
 -  **MDM Evolution:** Led the architectural shift from IDMC to Reltio, ensuring zero-downtime during migration.
- Enterprise Scaling & M&A Strategy**
 -  **M&A :** Key Contributor for modeling \$2B+ (*Hillrom, Vantive, SVB*) integration & spin-off without operational disruption.
 -  **Unified Taxonomy:** Standardized procurement data across systems to enable enterprise-wide spend visibility.
 -  **User Adoption:** Scaled internal ISC dashboards to 500+ daily active users and 10,000+ monthly recurring views.
- Algorithmic Efficiency & Automation**
 -  **97% Process Reduction:** Python-driven automation that collapsed a 15-hour weekly reporting cycle into 30 min.
 -  **Entity Resolution:** Developed a "parent-entity-first" matching, increasing matches by 80% with Pitchbook Dataset and reclaiming 100+ man-hours weekly.
 -  **Governance as Code:** Automated 80% of manual data mapping for cloud migrations using the Power Platform.
 -  **Reverse Engineering:** Deciphered, documented (metadata, data mapping) and data modeled 30% of enterprise project landscapes like e.g., AML, Medallia within first six months to unblock critical cloud initiatives.

Key Achievements:

- Recognition for resolving critical data integrity issues, protecting Multi-Million dollar Portfolios.
- Improved data-based decision making adoption by simplifying metrics and aligning scope with user needs.
- Played key roles (**Data Steward, Scrum Master, Mentor**) accelerating delivery and onboarding across teams.
